Subject: Re: Most Current Copy of Decision Document for Contractor to Estimate Hours
Attachments: Mega Merge rationale_ac.docx

This is what I believe to be the current version. I used the Mega Merge as a base and believe made sure all the other comments/changes were incorporated. In cases where changes conflicted, I revised as I thought best given the input. In other cases, I ignores some comments/changes that I didn't think were relevant. I provided responses to comments, as needed.

I already shared with Alan and some of the highlighted comments are directed to him (green) to address since they are more technical in nature. Other's I've highlighted (yellow) because I'd like to discuss further with Steve since I'm not sure I agree with everything he's put forward.

Note: This version may not reflect all changes or my review of the pesticides section as I did not work on that since I knew Jenny was working on a revised rationale.

In addition to making sure we address all remaining comments (or make a conscious decision not to address), we need to do a careful read to make sure our recommendations in the decision doc are mirroring what our current thinking is or at least broad enough that the more specific suggestions we're working on would fit within them.

Hi Allison,

Do you have the most current version of the decision document? I want to use it to help the contractor estimate hours for updating our administrative record and developing a list of abbreviations. I've attached several versions.

Also we should talk about how to move forward with this document and the RtC.
